## FAN BLADE INSTALLATION INSTRUCTION

**NOTE:** This blades set is for use only with "Fan Motor" SKU#518-596 and SKU#518-696; it is not intende to use with any other Hampton Bay fan models.

**Step 1** Attach blades to blade brackets using three screws and rubber washers as shown in Figure 1. Start a screw into the bracket, do not tighten. Repeat for the 2 remaining screws and washers.

**Step 2** Tighten each screw securely starting with the center screw. Make sure the blade is straight.

**Step 3** Fasten the blade assemblies to the motor by insert the tab from the blade brackets to the slot in the bottom motor housing, then tighten the two screws and washers already installed in the blade brackets (Figure 2).
